Education

Faculty of Arts - Alexandria University (2.58 GPA)

October 2021 - May 2025

Courses

Diploma in Frontend Web Development with PHP, AASTMT

October 2025

JavaScript & TypeScript, Successfully completed training at Elzero Web School, mastering modern JavaScript (ES6+) and TypeScript for building scalable and maintainable web applications

Projects

1 - Coffee Cups

A web-based coffee shop platform that allows users to explore curated coffee selections, browse a vibrant gallery, and connect for a personalized coffee experience. Includes an admin dashboard for managing products, orders, and user interactions. Designed with a focus on user experience, responsiveness, and modern web design.

Live Demo : <https://coffee-cups.page.gd/>

2 - Academy System

A web-based academic management system that allows teachers to log in securely and manage student records efficiently.

Teachers can add, edit, or delete student information through a user-friendly and professional interface, designed for smooth and intuitive operation. Teachers can also update their profile picture and view statistics on every page to monitor student performance

Live Demo : <https://academy-system.page.gd/>

3 - Mobile Store

A responsive e-commerce website for smartphones and accessories. Users can **browse products, view detailed descriptions, compare features**, and explore the latest innovations in mobile technology. Built with modern web technologies, focusing on **user experience and responsive design**.

Live Demo : <https://ahmedelsayed6179.github.io/Mobile-Store/>

4 - CartApp

This is a **React-based web application** that fetches **product** data from an **API**, dynamically displays a gallery of items, lets users add selected products to their **shopping cart**, and review their choices before checkout — with a clean, **responsive** UI for easy **browsing** and **shopping**.

Live Demo : <https://cart-app-bsc.netlify.app/>

5 - Code Store

A professional web platform for **showcasing and selling application source codes**, featuring a **modern, responsive design** with **interactive elements**. Developed using **JavaScript** to provide **dynamic and engaging functionality**.

Live Demo : <https://ahmedelsayed6179.github.io/Store-App/>

The first two projects are developed using **PHP** and **MySQL** for backend functionality, while the remaining projects are built with **HTML, CSS, and JavaScript** for frontend development.

Military Service

Exempt (in process of obtaining final exemption)

Hobbies

- Coding & Web Development
- Learning New Technologies
- Reading & Research
- Volunteering – Engaging in charitable and community initiatives.
