Summary

Passionate and motivated aspiring Frontend Developer with a strong foundation in **HTML, CSS, JavaScript, React, Angular and TypeScript**, seeking to transition into a professional development role. Skilled in creating **responsive, accessible, and user-friendly interfaces**, integrating **REST APIs**, and managing code with **Git**. Adept at learning new technologies quickly, applying best practices in coding, debugging, and performance optimization. Highly collaborative with strong **problem-solving** skills, eager to contribute to dynamic development teams and deliver high-quality web applications.

Education

Faculty of Arts - Alexandria University (2.58 GPA)
October 2021 - May 2025

Courses

Diploma in Web Development Using PHP, AASTMT
October 2025

Projects

1- SayHello
Real-time chat platform built with Angular delivering a responsive and interactive user experience. Users can start chatting instantly by entering a name and can use voice recording and emoji integration. The platform supports multiple languages including Arabic, English, and Spanish, and includes a dedicated mobile app for improved speed and usability. Messages can be reacted to with a single click, and the interface supports both dark and light modes. The platform is implemented as a Progressive Web App (PWA) allowing installation on mobile devices.
